

silver CMS

www.silvertouch.se

Features

- Quick and easy to install.
- Cutting edge technology - Silver CMS has been developed from the ground up using .NET 2.0 frameworks, SQL Server 2005 database for Windows 2003 server platform.
- Fast site development - Allows simple websites to be created quickly with minimum of efforts.
- Create unlimited number of pages and sub-pages.
- Automatically display the site navigation on each page. You don't even need to maintain it as every time a new page is created, the site navigation structure is automatically updated.
- Unique Page URL, Title, Meta Description and Meta Keyword adding for each page to make them Search Engine Optimized.
- A choice of Top, Middle, Left and Footer menu. You can choose to display all four or none of them for each page.
- Edit web content using WYSIWYG - Word like Rich Text Web Editor.
- Publishing, Reviewing, Editing and Deleting facilities for the pages created.
- Multi Lingual Content Addition for the Front End. You can add any language which is covered under Unicode UTF8.
- Creates a tree structure for sections to manage your Web site hierarchy. The tree is expandable to unlimited levels of pages & sub-pages. Also move sub-pages within the pages as your site grows and changes.
- Usage of DHTML (JavaScript) functions in your page creations.
- Define individual Header and Footer for all pages.
- Media asset repository (Images, Flash & Movies).
- Inbuilt Style Sheet Manager (Update the CSS from the admin section).
- Photo and Video Gallery feature provides unlimited photo & video uploading.
- Customized feedback form as per your requirements.
- Newsletter Sign up, Unsubscribe facility and Email Manager to send bulk or personalized emails to users.
- Site Summary provides summary of pages you have created on your website and Tracking of User registration for newsletter & special offer sign up -- whichever options you have provided on your website. Isn't it great tracking user statistics on your website?
- Comes with White Label facility. You can change the default Logo and Copyrights statement after installing the Silver CMS.
